Respect for products, partners, and our planet

Liquidseal is committed to protecting not only your products, but also the environment. Our eco-friendly coatings help preserve precious global resources by preventing wastage, and our goal is to take the lead in moving our industry forward towards a more sustainable future. By making optimal use of water and fertile soil, we not only extend the vase life of cultivated flowers like hydrangeas, but also help our planet blossom and thrive. Successful partnerships and a shared passion for excellence are what it will take to get things done.

Keeping hydrangeas fresh for longer

Innovative coating on hydrangea to meet rising demand for sustainability. Nature's perfect creation, expertly protected by Liquidseal's eco-friendly coatings. Our coatings allow your hydrangeas to flourish in all their natural splendour, while remaining fresh and pristine throughout the journey from the field to vase.

On life's special occasions, every detail matters - especially when it comes to the flowers. With Liquidseal's protective coating, your hydrangeas will arrive in perfect condition. Let us take care of the protection and preservation of your blooms, so you can focus on delivering the best quality hydrangeas to your customers, worry-free.

How it works

- Effective barrier**
- Controls evaporation
 - Slow release system

ECOLogic

Liquidseal offers biodegradable and compostable coatings that are safe for the environment and non-toxic to people. For hydrangeas, a specially formulated coating is used to enhance the quality and prolong the vase life.

Liquidseal's promise is to keep your flowers fresh for longer and can be used with confidence in a variety of settings and different environments. Mixing Liquidseal with commonly used fungicides can increase the effectiveness of the treatments and further reduce the development of Botrytis. This not only reduces product losses, but also improves the aesthetic aspect of flowers in vase presentation. Another advantage of Liquidseal is that it reduces evaporation, which helps to prevent hydrangeas from aging. This is especially important for cut flowers, which can quickly lose their freshness and beauty without the right care and attention. Liquidseal ensures that hydrangeas stay looking good for longer.

We keep your hydrangeas fresh

Liquidseal provides opportunities and benefits for all

Product benefits

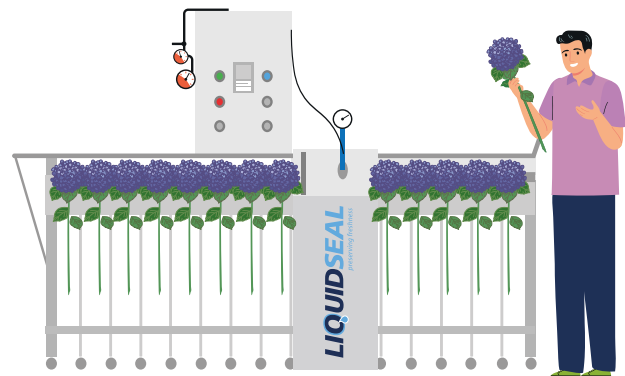

- Limits Botrytis infections and cross contaminations
- Reduces losses
- Improves the aesthetic aspect of the flower
- Extends the vase life
- Easy and inexpensive to apply and to implement
- Prolongs the product quality from field to vase
- Reduces evaporation and prevents the hydrangeas of aging

Opportunities

- Sustainable solution for the market
- Provides greater flexibility in (sea) transportation
- Quality retention
- Less need for chemicals and fungicides
- Access to new and distant markets
- Reduces supply chain costs
- Complies with requirements of zero-tolerance countries

Application & implementation

Our coatings can be applied manually or mechanically in various ways. Liquidseal is also easy to implement in existing production lines, whether in the country of origin or upon arrival in the country of sale. This versatility creates a flexible and low-cost solution for our partners across the supply chain.

Quality assurance

Liquidseal's fully certified range of coatings are internationally synonymous with innovation and quality in the postharvest industry. Our award-winning products comply with even the strictest requirements of zero-tolerance countries. This allows us to operate within a broad diversity of markets and serves as a framework for building on future enterprises. Our partnerships are shaped by mutual respect and shared values, supported by a foundation of solid results.

**The best time to start using Liquidseal was 10 years ago.
The next best time is today.**
